

**IMPORTANT - T73 Safety Recall Update**By **Mopar** on Friday, January 26, 2018

JANUARY 2018

# IMPORTANT UPDATE TO T73 SAFETY RECALL

## PASSENGER AIR BAG REPLACEMENT FOR '18 JEEP COMPASS (MP)

This communication is to reinforce the recent revision of the T73 recall (Passenger Air Bag on 2018 Jeep Compass).

### T73 SERVICE REPAIR REVISION - UNSOLD INVENTORY

FCA has released a change to the T73 service repair procedures. Effective, 1/26/18, dealers will no longer be required or able to remove and return the passenger airbag on their *unsold* vehicles in inventory under this recall. Any air bags that have already been returned to the PDC will be inspected. Please allow 4 - 6 days processing time for the inspection to occur and the air bag to be returned.

Dealers may now place an order for replacement part CSEJT731AA to remedy *all* vehicles included in this recall (sold and unsold). Parts will be on order restriction based on dealer group size. As a reminder, an initial allocation of replacement parts (CSEJT731AA) have already been shipped to you to support your customer vehicles.

Please review the revised service repair instructions as posted in Global Recall System.

**FCA appreciates your continued support on this campaign!**
