JANUARY 2018

## IMPORTANT T82 & T83 SAFETY RECALL REMINDER

### KIDDE FIRE EXTINGUISHER ON CERTAIN FCA VEHICLES

---

Kidde, a manufacturer of fire safety products, has announced a defect on plastic-handle or push button 'Pindicator' Fire Extinguishers, some of which either were provided as original equipment (**T82**) or sold after vehicle delivery through Mopar service parts (**T83**).

These extinguishers may become clogged, preventing the extinguisher from discharging as expected or requiring excessive force to activate the extinguisher. Additionally, in certain models, the nozzle may detach from the valve assembly with enough force that it could cause injury and also render the product inoperable.

#### **T82 & T83 CUSTOMER AND DEALER UNSOLD INVENTORY HANDLING**

With the launch of T82 (Kidde Fire Extinguisher), both sold and unsold VINs are impacted and are live and displayed in DealerCONNECT. Vehicles impacted include certain models from 2004 to 2018 equipped with a fire extinguisher (click [HERE](#) to see the "New Safety Recall Advanced Communication" for details of models impacted.)

**\*\*To address safety concerns for the customer or the vehicle unsold in a dealer's inventory, fire extinguishers can be removed from the vehicle; however, this will NOT clear the recall or make the vehicle eligible for sale.\*\***

FCA is actively working to provide the most expedient resolution to this recall so that all VINs can be repaired. We appreciate your patience and support on this campaign!
