WHAT IS THE PROBLEM?

On motorhomes affected by this recall, the structural support for the side-facing sofa seatbelt attachment hardware, installed in the floor framing during original motorhome production, does not meet the specifications for seatbelt anchorages.

In the event of sudden braking or a vehicle crash, the seatbelts may detach from the floor framing, posing a risk of personal injury.

WHAT SHOULD YOU DO?

Please make certain your motorhome is immediately inspected and repaired by contacting Renegade RV.
