IMPORTANT SAFETY RECALL

Front Propeller Shaft Bolts

Dear [Name],

This notification is being sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain [2014 through 2017 model year (LX) Chrysler 300 and (LD) Dodge Charger] vehicles equipped with All Wheel Drive (AWD).

WHY DOES MY VEHICLE NEED REPAIRS?

The front propeller shaft on your vehicle ^[1] may have bolts that were not fully tightened to the proper torque specification during vehicle assembly. Front propeller shaft bolts that are not fully tightened may allow the front propeller shaft to become loose and disconnect from the vehicle. Front propeller shaft bolts that are not fully tightened may be detectable due to noise and vibration. **If the front propeller shaft disconnects from the vehicle, it may result in damage to powertrain and underbody components and may lead to loss of motive power which could cause a crash.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE

FCA will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will replace the front propeller shaft bolts and tighten the bolts to the proper torque specification. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit. Your time is important to us; please be aware that these steps may require more time. The estimated repair time is one hour. We recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
