Dear smart Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Daimler AG (DAG), the manufacturer of smart vehicles, has decided that certain Model Year 2016 smart fortwo vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) number 108 (Lamps, Reflective Devices and Associated Equipment). Our records indicate that your vehicle is included in the affected population of vehicles. Remedy parts are now available.

What is the CONCERN?

On certain MY16 smart fortwo vehicles, the horizontal headlight adjustment mechanism on these vehicles may not have been properly sealed off to prevent future adjustment. If the headlight can be adjusted horizontally, the headlight may be adjusted outside of the designed specifications, and potentially reduce the driver's visibility of the roadway and increase the glare to oncoming traffic, increasing the risk of a crash.

What will your DEALER DO?

An authorized Mercedes-Benz dealer will install the headlamp caps on the vehicle. This service will be provided free of charge. We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time is approximately 10 minutes, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz dealer will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time.

What should YOU DO?
