IMPORTANT SAFETY RECALL

Occupant Restraint Control Module

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain [2013-2016 (DS) RAM 1500 Pickup, 2013-2016 (DJ) RAM 2500 Pickup and 2014-2016 (D2) RAM 3500 Pickup] vehicles.

WHY DOES MY VEHICLE NEED REPAIRS?

The Occupant Restraint Control (ORC) module on your truck ^[1] may activate a diagnostic trouble code (DTC) due to external stimulus which disables its ability to sense vehicle rollover events. When the DTC is set, airbag and seat belt pretensioner deployment based on rollover sensing is disabled for the ignition cycle in which the DTC was set. **The loss of rollover-activated side air bags and seat belt pretensioner deployment capability during a crash may increase the risk of injury or death.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will reprogram the ORC module with new software. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit. Your time is important to us; please be aware that these steps may require more time. The estimated repair time is one hour. We recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
