

IMPORTANT SAFETY RECALL

This notice applies to your vehicle, [REDACTED]

June 23, 2017

Dear Toyota Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Southeast Toyota Distributors, LLC ("SET") has decided that a defect which relates to motor vehicle safety exists in certain 2013-2017 Toyota Tundra and Sequoia vehicles equipped with a SET installed accessory 20 inch Rockstar wheels.

What is the condition?

SET either installed, or sold to dealers to install, an accessory 20 inch Rockstar wheel for 2016 - 2017 Toyota Tundra. Toyota dealers also installed these wheels on one 2013 Tundra, one 2014 Tundra, and one 2016 Sequoia. The upgrade included lug nuts. Some of the lug nuts were not manufactured to SAE specifications. It has been determined that the defective lug nuts may crack and detach if not properly torqued during service of the tire and wheel assembly, increasing the risk of a crash.

What will Southeast Toyota Distributors, LLC do?

The Toyota dealer will install new replacement lug nuts that meet the SAE J2316 standard **at no cost to you**. The wheels will also be inspected visually for any unusual wear in the lug nut seat area. Wheels with unusual wear will also be replaced as may be appropriate **at no cost to you**.

The repair will take approximately 30 minutes or less. However, depending upon the dealer's work schedule, it may be necessary to make the vehicle available for a longer period of time.

This is an important Safety Recall
