Passenger Air Bag Inflator Replacement – Safety Recall 1317F

National Highway Traffic Safety Administration (NHTSA) Campaign No. XXX-XXX

July XX, 2017

This notice applies to your vehicle: 20xx Mazda Model name VIN _____

Dear XXXX:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Mazda Motor Corporation has decided that a defect which relates to motor vehicle safety exists in 2009-2011 Mazda6, 2007-2011 CX-7 and 2007-2011 CX-9 vehicles. **If you are a recipient of this notice, your vehicle is included in this Safety Recall. Note: Recall 1317F is replacing 9516E (NHTSA Campaign No. 16V356) with the permanent air bag inflator replacement part.**

You may have received a previous notice of recall 9516E, notifying that the passenger frontal air bag inflator would be replaced with a new one, which is an interim repair. According to our records, as of XXXX, your vehicle has not had this interim repair performed. This recall notice 1317F is for the final repair using a modified inflator and replaces the previous recall 9516E.

What is the problem?

In the subject vehicles, continued exposure to high levels of absolute humidity may cause the passenger frontal air bag inflator housing to rupture and deploy abnormally in the event of a crash necessitating deployment of the passenger frontal air bag. **An inflator rupture could result in metal fragments striking the driver or other vehicle occupants, resulting in serious injury or death. It is extremely important to schedule this repair as soon as possible, to ensure your safety and the safety of your passengers.**

What will Mazda do?

Your Mazda dealer will replace the passenger frontal air bag inflator with a modified one, **free of charge**. The repair should take less than one hour to complete; however, it may take longer.
