SAFETY CONCERN: Wheel welds and or cracks

MESSAGE:

Good afternoon,

We regret to inform you that we have had a safety concern brought to our attention concerning the wheels installed on your apparatus. We have determined that the wheels may be underrated for the weight of your apparatus, and therefore could fail while in use causing serious personal injury or death and/or property damage.

We are working with our supplier to expedite correction of this problem. In the meantime **we recommend that the apparatus not be driven**. If you have your original wheels we would gladly pay to have your local garage or tire shop swap them back to your vehicle.

We realize the importance of your vehicle being ready to respond at all times and are doing everything we can to minimize the down time. We apologize for this inconvenience; however, safety and satisfaction with our products is our utmost concern.

We will be in contact with you shortly with more information on how this problem will be corrected. Please contact the undersigned if you have any questions.

Respectfully,

Scott J. Patchin
Owner
CSI Emergency Apparatus
