IMPORTANT SAFETY RECALL 17507

NHTSA RECALL NO. 17V-575

This notice applies to your vehicle identified on the enclosed card.

Dear INTERNATIONAL® Customer,

This notice applies to your vehicle identified on the enclosed card. This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Navistar has decided that a defect which relates to motor vehicle safety exists in certain 2016 9900i, DuraStar®, LoneStar®, PayStar®, ProStar®, TerraStar®, TranStar®, and WorkStar® model trucks built 4 March 2015 thru 18 June 2015 and FBC bus, SFC bus, and FE bus chassis built 9 March 2015 thru 21 July 2015 with Spicer D or E series steer axles.

REASON FOR THIS RECALL

The castellated nut and cotter pin that fastens the tie rod end to the steering knuckle may have not been tightened to their specified assembly torque and over time may loosen resulting in looseness in steering.

RISK TO MOTOR VEHICLE SAFETY

If a vehicle operator continues to operate the vehicle, the tie rod may in rare instances become disconnected from the knuckle resulting in a loss of control of the vehicle and may contribute to a vehicle crash.

DEFECT REMEDY

The repair will involve an inspection to ensure the castellated nuts are tightened to their specified assembly torque. For any castellated nuts that cannot be sufficiently torqued, Navistar will replace the tie rod stud and knuckle. Dealers have parts and instructions to repair your vehicle. The repair will be performed free of charge and take approximately 45 minutes to 6.5 hours to complete.
