Dear Mercedes-Benz Sprinter Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Daimler AG (DAG), the manufacturer of Mercedes-Benz Sprinter vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2017 Sprinter vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

**What is the CONCERN?**

On certain Model Year 2017 Mercedes-Benz Sprinter vehicles equipped with Crosswind Assist, the control units for the ESP (Electronic Stability Program) may not have been coded for the Crosswind Assist Function. In the event of strong, gusty crosswinds where the vehicle is travelling above approximately 50 mph, the Crosswind Assist intervenes with automatic brake applications. Should the vehicle not have been coded for the Crosswind Assist Function, the automatic brake applications would not take place. This could impact the driver's safety expectations, which may increase the risk of a crash.

**What will your DEALER DO?**

An authorized Mercedes-Benz Sprinter dealer will configure the ESP control units for the Crosswind Assist Function. This service will be provided free of charge. We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time can be up to **approximately 30 minutes**, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz Sprinter dealer will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time.
