

## SAFETY ADVISORY # 17-285

### Voltage Generator Fuel Line

Keystone is conducting a voluntary RECALL notification campaign in accordance with the National Highway Transportation and Safety Act. It has been decided the vehicles subject to this recall campaign may not have the fuel line clamped to the generator properly. If the fuel line disconnects, it increases the risk of a fuel leak leading to an increased risk of fire, personal injury and property damage.

**Models Included:** 2017-2018 Voltage Models with Onan 5.5 Generator Option

**Serial Number Range:** 2017 HZ991257 – HZ991353

2018 JZ990000 – JZ990156

**Parts Required:** - None

**Tools Required:** - Slotted screwdriver

**Note – Check serial number on Key Express to verify the campaign is open. Some vehicles were repaired before they left Keystone.**

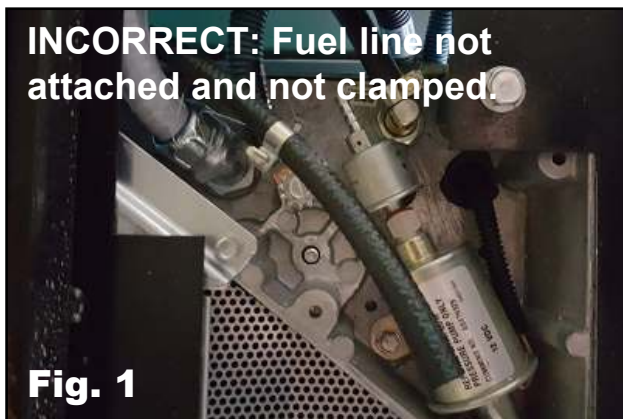

### REPAIR INSTRUCTIONS

#### Step 1

Locate the trailer on a level, flat and hard surface. Chock the wheels.

#### Step 2

Look under the generator and inspect the incoming fuel line and clamp to the generator where the line attaches to the fuel filter. Verify the fuel line is fully engaged on the barb fitting and the clamp is in the proper position and it is tight. Incorrect installation Figures 1 & 2. See Figure 3 for correct installation.

**Fig. 3**

**WARRANTY REIMBURSEMENT**

Submit the claim on Key Express using **Flat Rate Code # 7128542A** with **Safety Advisory # 17-285** noted in the customer complaint section of the form. The amount of time authorized for this repair is .5 hour.

Please call Keystone RV Customer Service at **(855) 382-4100** if you have any questions.
