

SAFETY ADVISORY # 17-291

Coleman A/C Wiring

It has been determined that on some 2018 Coleman models built in plant 840 have the incorrect type of wire connectors used to attach the 110 volt wiring at the A/C control box. This advisory explains how to correct the problem if it exists.

- Models Included:** 2018 Coleman: All Models
Serial Number Range: JM931332 – JM931665
Parts Required: 2 or 3 yellow or tan twist-on wire connectors (purchase locally)
Tools Required: - Wire stripper/cutter

Note – Check serial number on Key Express to verify the campaign is open.

REPAIR INSTRUCTIONS FOR DUCTED AND NON-DUCTED A/C

Ducted A/C

Step 1

Locate the A/C return air filter to find the control box and remove the cover.

Step 2

Remove the black electrical tape from the bell cap connectors on the 110v wiring only, Figure 1.

Step 3

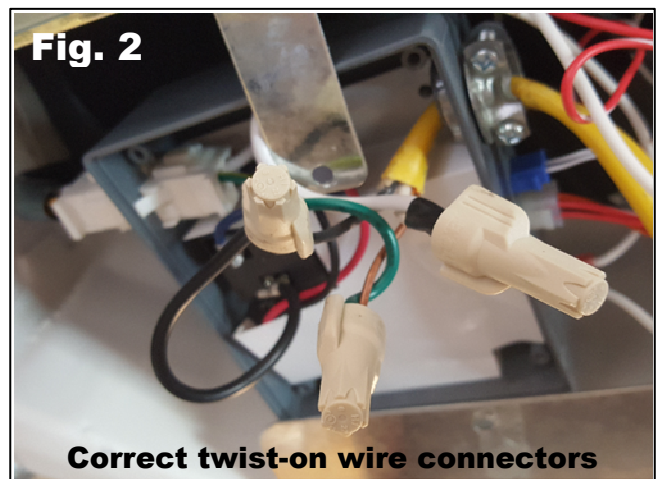

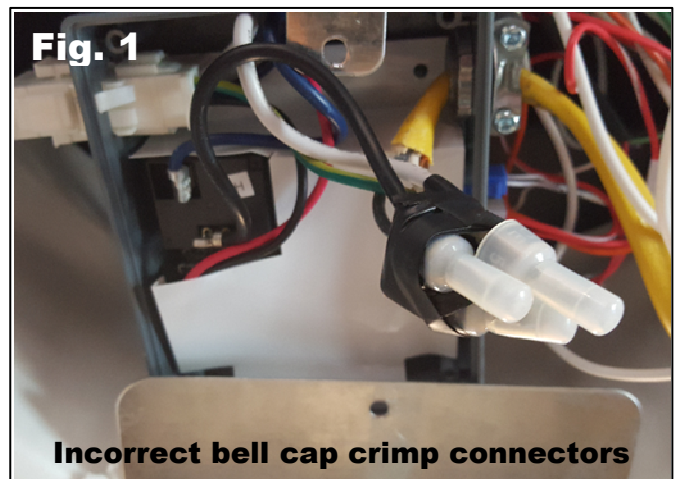

Replace the bell cap connectors with twist-on connectors listed for up to three 12-gauge solid wires, Figure 2.

Step 4

Tape each connector with black electrical tape, and then tape them together.

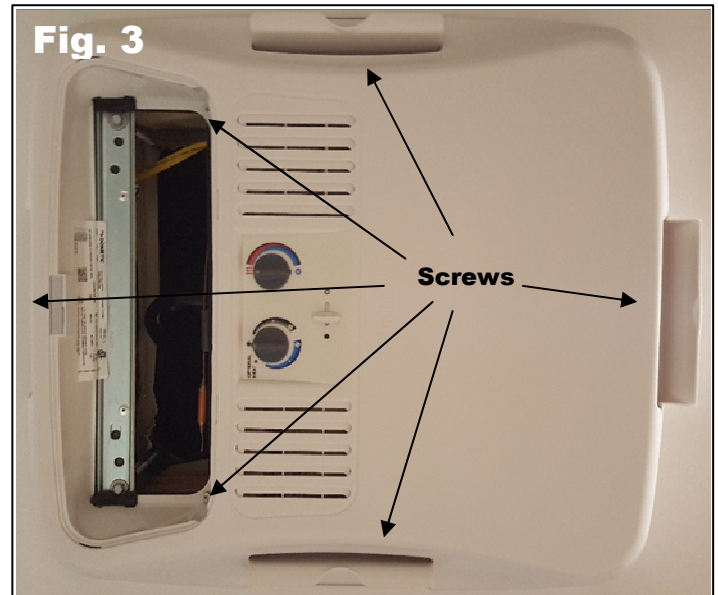

Step 5

Reinstall the cover and return filter, proceed to warranty reimbursement.

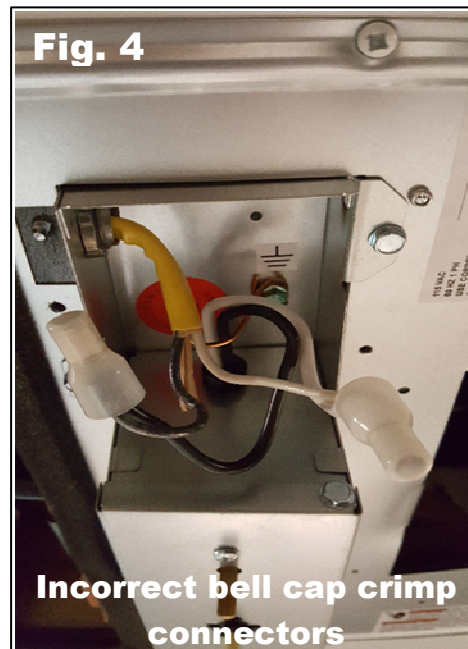

Non-Ducted A/C**Step 1**

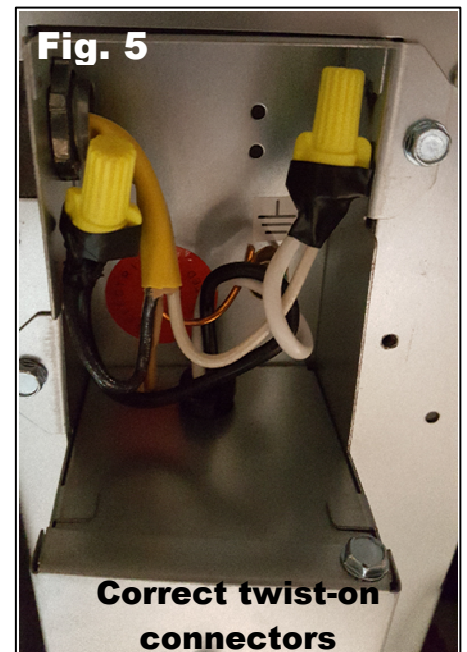

On manual controls, the entire lower vent needs to come off (10 screws, 2 knobs) to access the junction box, Figure 3.

**Step 2**

Remove the black electrical tape from the bell cap connectors on the 110v wiring only. The bare ground wire will attach to the ground screw on the junction box, Figure 4.

**Step 3**

Replace the bell cap connectors with a yellow or a tan twist-on connectors, Figure 5.

**Step 4**

Tape each connector with black electrical tape, and then tape them together.

Step 5

Reinstall the cover and return filter, proceed to warranty reimbursement.

WARRANTY REIMBURSEMENT

Submit the claim on Key Express using **Flat Rate Code # 7129142A** with **Safety Advisory # 17-291** noted in the customer complaint section. The amount of time authorized for repair is **0.5 hour**.
