

Sewer Hose Carrier Recall Instructions

NHTSA Recall Number 17V-518

Transport Canada Recall Number 2017-409

KZRV Campaign Number KZ-2017-05

(Revised 11/6/2017)

1. Safely raise the coach and remove the off door front tire.
2. Inspect the tire for any signs of physical damage indicating contact between the tire and sewer hose carrier. If wear has been found, replace the tire. The part number for the tire is listed below.
3. Using either a sawzall or cutting torch, remove the entire length of square tubing from the frame.
4. With a grinder cleanup and smooth the surface of the frame.
5. Paint the area of the frame with black spray paint.
6. Reinstall the tire and lower the coach.
7. Place the new sewer hose compartment tube starting at 99 1/16" from the front of the ODS frame (in between the slide out arms) at the bottom of the frame rail, and screw it in with 1" self-tapping lags.

(Please use Job Code 3369 when submitting the warranty for the recall. The time allowed is 2 hours.)

Please order the repair parts for the sewer hose carrier recall through the KZ Warranty Rep.
