***** DO NOT DRIVE ***
YOUR Mustang**

The airbag in your 2005 Mustang is defective and under an **URGENT** safety recall. As your vehicle ages, the defective airbags become more likely to explode in a crash. When an airbag explodes, sharp metal fragments can shoot toward the driver and passengers, resulting in serious injury or death. Due to this risk, Ford has issued a **DO NOT DRIVE** advisory on your vehicle. Please call your local Ford or Lincoln dealer today to schedule an appointment for this urgent **FREE** airbag recall repair.

For your convenience, mobile repair services at the vehicle's location, vehicle pick-up and delivery, or a loaner vehicle may be provided at no charge.

If you no longer own this vehicle, kindly visit fordairbagsurvey.com to update your information.

If you have questions or concerns, contact our Airbag Recall Team at 888-985-0453.
