***** DO NOT DRIVE *****
YOUR 2008 Mustang

The **"Do Not Drive"** advisory relates to certain Ford vehicles with unrepaired Takata airbags, including **your 2008 Mustang**. This advisory is a serious safety measure because these faulty airbags can explode with excessive force during a crash, potentially causing severe injury or death.

What should you do if you own one of these vehicles?

If you own one of the affected models and haven't had the Takata airbag replaced, Ford urges you not to drive the vehicle until the repair is completed. Owners can contact the Airbag Recall Team at fordairbagsurvey.com or **881-441-1108** for assistance.

Special Service options may be available upon request through participating dealers:

- Free towing to the dealership for repair.
- Mobile service for repairs if necessary.
- Free interim loaner vehicles while your vehicle is being repaired.

How can you check if your vehicle is affected?

You can verify if your vehicle is subject to the recall by visiting:

- Ford's official recall website: <https://www.ford.com/support/recalls/>
- National Highway Traffic Safety Administration's (NHTSA) recall page: <https://www.nhtsa.gov/recalls>

Don't delay! Even if your vehicle hasn't shown any signs of issues, the risk posed by the faulty airbags is significant. **TAKE ACTION NOW** to ensure your safety and the safety of your passengers.
