

SAFETY NOTICE

Diono All-In-One Convertible Car Seats

Diono is a leading designer and manufacturer of child safety seats and other juvenile products. We are committed to improving safety for babies and young children traveling in cars.

PROBLEM: As a result of our rigorous quality control, and ongoing product testing, we have established that if our convertible child safety seat is installed forward-facing in vehicles with a lap-belt (type 1) only without top tether, it crosses into a technical non-compliance. There is a risk of head or chest injury, although no injuries have been reported to date. If our convertible child safety seat is being used with a lap and shoulder safety belt (type 2) or with our SuperLATCH system, or top tether the child safety seat is unaffected.

Lap belt ONLY with NO top tether.

You may be affected by the current recall.
Call 1-855-215-4951

Lap belt with top tether.

You are not affected by the current recall.

LATCH with or without top tether.

You are not affected by the current recall.
