Subaru Recall Campaign TKA17
NHTSA Recall No. 17V-014
Zone A – PG 7
March 2017

Dear Subaru Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

SUBARU OF AMERICA, INC. has decided that a defect, which relates to motor vehicle safety, exists in certain Subaru vehicles listed below, equipped with a non-desiccated Takata-sourced passenger side frontal air bag containing the propellant Phase Stabilized Ammonium Nitrate (certain vehicles only):

- 2005-2006 model year Baja
- 2009-2012 model year Forester
- 2006-2011 model year Impreza
- 2006-2012 model year WRX and STI
- 2010-2012 model year Legacy
- 2010-2012 model year Outback
- 2006-2012 model year Tribeca

You received this notice because our records indicate that you currently own one of these vehicles.

DESCRIPTION OF THE SAFETY DEFECT AND SAFETY HAZARD

The affected vehicles are equipped with a Takata-sourced passenger side frontal air bag that may be susceptible to moisture intrusion. Over time, that could cause the inflator to rupture when the passenger's frontal air bag deploys in a crash. **If the inflator ruptures, metal fragments could strike vehicle occupants, potentially resulting in serious injury or death.**

WHAT YOU SHOULD DO

Parts are not available at this time. The National Highway Traffic Safety Administration (NHTSA) has ordered automakers to accelerate the production of remedy parts, and to prioritize repairs for vehicles according to risk factors identified through testing. You will be contacted when parts supply is sufficient, which we anticipate to be by December, 2017.

Until this repair is performed, do not allow passengers to ride in the front passenger seat.

If you are unable to preclude passengers from riding in the front passenger seat, please be sure to ask your Subaru retailer about possible options for alternative transportation until your vehicle is repaired.
