

**Certain 2016 - 2017 Model Year Tundra  
Resin Rear Bumper Reinforcement Brackets  
IMPORTANT SAFETY RECALL (Interim Notice)**

This notice applies to your vehicle: [VIN]  
NHTSA Recall No. 17V051

**INTERIM NOTICE**

We are currently preparing the final remedy. We will notify you again when the remedy is available.

Dear Toyota Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Toyota has decided that a defect, which relates to motor vehicle safety, exists in certain 2016 - 2017 Model Year Tundra Vehicles.

You received this notice because our records, which are based primarily on state registration and title data, indicate that you are the current owner.

**What is the condition?**

The involved vehicles are equipped with resin rear step bumpers and resin reinforcement brackets at each corner. In the event of an impact to the corner of the bumper, the resin bracket may become damaged but not be noticed. If a person steps on the corner of the bumper that is damaged, a portion of it may break away, increasing the risk of injury.

The remedy, when available, will consist of replacing the resin reinforcement brackets with steel ones at **NO CHARGE**. The rear bumper pad and rear bumper plates will also be replaced.

**What should you do?**

We appreciate your patience while we prepare the remedy.

***You will receive a second owner notification when the remedy is available***

**Until the remedy is performed, do not step on the rear bumper, especially if it appears to be damaged in any way.**

**What if you have other questions?**

- ***Your local Toyota dealer will be more than happy to answer any of your questions.***
