IMPORTANT SAFETY RECALL

Brake Transmission Shift Interlock

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain [2009-2017 Model Year (DS) RAM 1500 Pickup, 2010-2017 Model Year (DJ) RAM 2500 Pickup, 2010-2017 Model Year (D2) RAM 3500 Pickup, 2011-2017 Model Year (DD) RAM 3500 Chassis Cab, 2016-2017 Model Year (DF) RAM 3500 10K GVWR Chassis Cab, 2011-2017 Model Year (DP) RAM 4500/5500 Chassis Cab] vehicles equipped with a column shift automatic transmission. This safety recall does not affect vehicles equipped with a rotary or floor shifter or manual transmission.

WHY DOES MY VEHICLE NEED REPAIRS?

The Brake Transmission Shift Interlock (BTSI) locking pin on your vehicle ^[1] may become stuck in the open position. A BTSI locking pin stuck in the open position may allow the transmission to be shifted out of PARK and to any gear position without depression of the brake pedal and/or without the key in the ignition, if a key is applicable. **The ability to shift the transmission out of the PARK position without a key in the ignition or a brake pedal application, increases the potential for an unintended vehicle rollaway that may result in a vehicle crash or injury without prior warning.**

WARNING: Never use the PARK position as a substitute for the parking brake. Always apply the parking brake fully when parked to guard against vehicle movement and possible injury or damage. Refer to your owner's manual for additional information regarding proper parking brake usage.

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

The remedy for this condition is not currently available. We are making every effort to finalize a remedy and obtain parts as quickly as possible, and will service your vehicle free of charge (parts and labor).
