

## KDS – Testing the SC 147 Engine Noise Microphone

To verify if the SC 147 Theta II Engine Inspection and/or Replacement Campaign microphone is detecting and providing input to the KDS Noise Checking feature, a supplemental app may be downloaded from the Play store to ensure the microphone is operating. Follow the procedure below to validate the engine noise microphone. **Note: connecting the microphone to a PC will not produce valid results.**

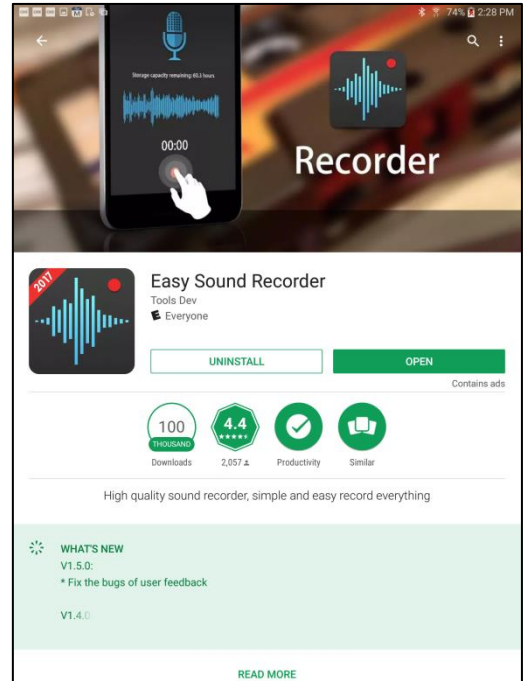

1. Select the “Play Store” on the tablet

2. Search for “Sound Record” and select “Easy Sound Recorder”

3. Install and open the “Easy Sound Recorder” app

4. Ensure the microphone is connected to the tablet, select the red dot to start the recording

Tap the dip-stick end of the tool on a table.

The waveform should be similar to the image
