Re: 17V-483

As referenced by the recall number above, notifications, by way of inspection/repair procedure, were sent out to the customer's headquarters on July 28, 2017. Utility dealers needing to be involved in the inspection/repair were also notified ensure they were well versed and equipped; the dealer notifications initiated on the same date of July 28, 2017.

Notifications to both Customer and Dealer included affected VINs of trailers needing the inspection/repair.
