

Dear Indian Motorcycle Customer,

Indian Motorcycle has determined that motorcycles may have been manufactured with a headlight that does not comply with the Federal Motor Vehicle Safety Standards (FMVSS), and has issued Safety Bulletin I-17-03. Our records indicate that you have purchased a motorcycle that may be affected.

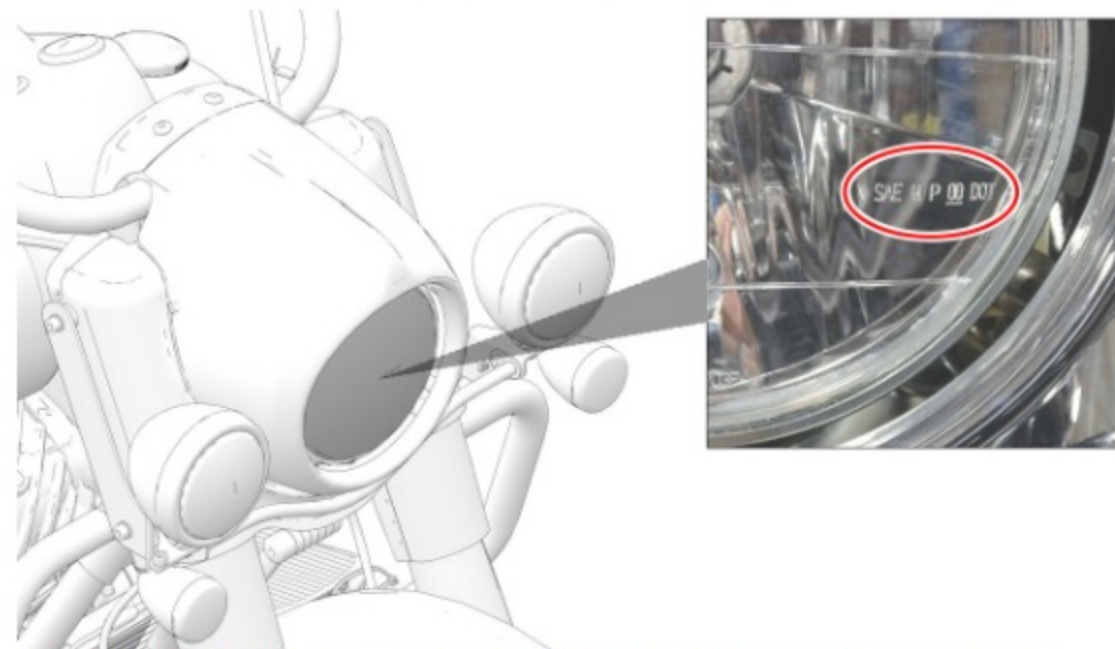

The reason for this notice:

Motorcycles equipped with halogen headlights may have been manufactured using a non-compliant headlight during final assembly. Motorcycles, distributed for sale in North America, may be equipped with an E4 (European) headlight assembly which does not comply with the applicable Federal Motor Vehicle Safety Standards. The E4 headlight has different photometric and marking requirements which must be inspected and, if necessary, replaced with the FMVSS compliant headlight.

What you should do:

Contact your Indian Motorcycle dealer to schedule an inspection; or if you prefer, inspect the headlight on your motorcycle for the markings indicated below.

- 1.) Look at the center headlight from the front of the motorcycle. In the 4 o'clock position, the letters "SAE" should be visible if you have the correct headlight.
- 2.) [Use our feedback form](#) to report your findings and for more information.

*This recall applies to both fairing and non-fairing models. Non-fairing version shown in illustration.

Please accept our apologies for any inconvenience this may cause you. Your safety and continued satisfaction with your Indian Motorcycle is our primary concern. Thank you for your prompt attention to this matter. If you have any questions, please call our Customer Service department at **1-877-204-3697** to speak with a representative.

Sincerely,
Indian Motorcycle Service
