**T80/NHTSA 17V-820 Heated Seats**

*If you no longer own this vehicle, please help us contact the new owner so he or she can have their vehicle repaired as soon as possible.*

## Repair Details

The driver or passenger seat cushion or seat back on your truck may experience overheating due to fatigue failures in the heater pad. Fatigue failures of the heater pad can cause hot spots to develop which can propagate into burn holes in the seat cushion or open flames in the interior of the vehicle. The heated seat control system used in these vehicles cannot detect these hot spots that cause thermal damage to the seat and will not shut down automatically. Any of these consequences may increase the risk of occupant injury or cause a fire in the vehicle.

### How do I schedule my FREE repair?

**FCA US will repair your vehicle FREE of charge.** To do this, your dealer will enhance the seat heating system to include updated control features and replace any damaged seat components. In addition, your dealer will require your vehicle for proper check-in, preparation and check-out during your visit. Your time is important to us; please be aware that these steps may require more time. The work will take about 3 hours to complete. However, additional time may be necessary depending on service schedules.

#### Scheduling Options

1. **Contact your Chrysler, Jeep®, Dodge or RAM dealer directly to schedule an appointment.**  
Mention Safety Recall T80, and have your VIN ready when calling.

**If you have already had this repair completed, no action is necessary.** We sincerely apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
