

Kidde Fire Extinguisher T82

#	Make	Model	MY Start	MY End	Body Style	Production Start	Production End	Descriptive Information
1	Ram	3500	2014	2018	Pickup Truck	8/13/2013	11/14/2017	According to the Kidde Part 573 Defect and Noncompliance Information Report filing, some Kidde fire extinguishers may become clogged or require excessive force to activate. This typically occurs if a user depresses the lever for less than one second, emitting a small amount of powder or air, and releases the lever. In certain models, the nozzle may detach from the valve assembly with enough force that it could cause injury and also render the product inoperable. Affected fire extinguishers are included in Kidde recall 17E-062. The scope of this vehicle recall was determined by comparing the suspect Kidde part numbers included in recall 17E-062 against the Mopar and FCA US LLC ("FCA US") engineering Roadside Emergency kits that contain Kidde fire extinguishers. Similar vehicles not included in the recall population differ from the suspect vehicles in that they were not sold with a Roadside Emergency kit that includes a fire extinguisher recalled as part of Kidde's equipment recall 17E-062.
