Description of Defect :

Description of the Defect : The unit will collect debris under cab area and when operator doesn't follow the daily recommended cleaning the debris will accumulate over time and come into contact with the hot exhaust system and other components.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : Combustion of flammable material

Description of the Cause : NR

Identification of Any Warning that can Occur : NR

Supplier Identification :

Component Manufacturer

Name : NR

Address : NR

Country : NR
NR

Chronology :

We were notified on or around 12/05/2107 that a unit had a fire under the cab area of the unit.

Description of Remedy :

Description of Remedy Program : The exhaust tubing that was not insulated was insulated with heat resistant wrap to eliminate the exposure to debris. Our dealers completed the inspection and installation and submitted a warranty claim to us for reimbursement.

How Remedy Component Differs from Recalled Component : The remedy now completes the wrap on the exhaust system, before there was a gap in coverage.

Identify How/When Recall Condition was Corrected in Production : We added the additional wrap to our build instructions on that model, effective December 2017

Recall Schedule :

Description of Recall Schedule : Dealers and end users were contacted 12/05/2017 and all machines were corrected by 1-31-2018
