

New Safety Recall Advanced Communication – U03

FCA US LLC (FCA US) announced a safety recall on certain 2009-2010 Dodge RAM, 2009 Dodge Durango, 2009 Chrysler Aspen, 2009-2013 Chrysler 300, 2009-2013 Dodge Challenger, 2009-2013 Dodge Charger, 2009-2011 Dodge Dakota, and 2009-2013 Jeep Wrangler vehicles.

VINs identified as being involved in this campaign are expected to be live and searchable by early February.

IMPORTANT: Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a non-desiccated ammonium nitrate inflator with degraded propellant. Inflator activation in a vehicle crash where the Passenger Airbag (PAB) is designed to deploy, may result in an inflator rupture. An inflator rupture may cause metal fragments to pass through the air bag and into the vehicle interior at high speed, which may result in injury or death to vehicle occupants.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to replace the PAB inflator. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 1st Quarter of 2018.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
