SAFETY RECALLS GOP/GOR/H0A & E04/DSF/J0A/J0B/J0C *(Remedy Notice)*

****Parts Status UPDATE****

Certain 2010 – 2016 Model Year 4Runner
Certain 2003 – 2008 Model Year Corolla

The back order for 4Runner inflators and Corolla airbag assembly parts has been recovered. Parts supply is healthy for ALL models affected by the Takata recalls. Please educate your staff on the overall parts supply situation, and please continue to make appointments and remedy vehicles involved in the Takata recalls.

There are no longer delays in receiving part numbers **04007-58135** used in the remedy of 4Runner vehicles, and **73970-02190-B0/B1/E0** and **73970-02180-B0/B1/E0** used in the remedy of Corolla vehicles **ONLY in the infrequent situation** when the airbag assembly is required to be replaced to complete E04, DSF, J0A, J0B, and J0C.

We will keep you updated regularly if the supply of these parts changes. Please continue to schedule customers affected by the Takata recalls.

Regarding the 4Runner parts, for dealers outside of GST/SET, the CPOR system has been in use since early March for this part and allows you to track customer orders by VIN and Order Reference Number.

Thank you for your cooperation.
