RE: **MAIL UPDATE**-Stop Sale/Safety Recall: 2009-2013 Multi-Model Acura Passenger's Airbag Inflator

On January 10, 2018, Acura announced a stop sale and safety recall for specific model year 2009-2013 multi-model Acura vehicles for front passenger's airbag inflators that could potentially rupture in a crash due to prolonged temperature cycling and environmental moisture.

As a follow-up to the special message by Bruce Smith, Senior Vice President of Parts, Service & Technical Division regarding this announcement, we will be mailing customer notifications for this recall beginning 2/20/18 through 2/26/18. Thank you.
