

U01 Safety Recall - VIN CompletionsBy **Mopar** on Thursday, February 22, 2018

FEBRUARY 2018

**U01 SAFETY RECALL - VIN COMPLETIONS****REPROGRAM POWERTRAIN CONTROL MODULE (2017 CHRYSLER PACIFICA)**

Launched on 2/21/2018, the U01 safety recall on the 2017 Chrysler Pacifica addresses the customer concern of a vehicle stalling without prior warning. This safety recall remedy involves a software flash of the powertrain control module.

VEHICLES IMPACTED BY U01 THAT ARE ALREADY MARKED COMPLETE

The remedy found in the U01 software release, was a part of the below initiatives:

- T23 CSN (EGR Valve Function)
- TSB 18-069-17 (PCM reprogram)

Vehicles that have had either of these repairs performed prior to the launch of the U01 remedy release are marked complete and require no further action.

All customers will be notified by mail of the recall remedy release starting on March 2nd, 2018. customers who have already had the CSN or the TSB performed will be notified in that mailing that no repair is needed.
