Subject: Safety Bulletin T-18-01 UPDATE

Key Actions & Timing: Please Read

Questions: Contact Polaris Technical Service

Dear Slingshot Dealer,

Updated instructions for T-18-01 (Slingshot Seat Base Frame Inspection / Replacement) have been released [CLICK HERE](#). With this release, the ASK Polaris case approval requirement has been discontinued. If vehicles require seat replacement after inspections, parts can be ordered using the standard parts ordering channels.

*Based on current warranty data, only a small number of vehicles will exhibit the manufacturing defects described in the bulletin and require seat base replacement. The required inspection will resolve the majority of the affected vehicle population without requiring seat base replacement. **While an ASK Polaris case is no longer required, parts should be ordered on an as-needed basis only.***

On behalf of the entire Polaris Service team, we thank you for your continued support.
