## **New Safety Recall Advanced Communication – U37**

FCA US LLC (FCA US) has announced a safety recall on certain 2015 through 2018 model year (LD) Dodge Charger pursuit vehicles equipped with All-Wheel Drive (AWD) and a V8 engine.

VINs identified as being involved in this campaign are currently live and searchable.  
**Stop sale is in effect for the above-identified vehicles.**

**IMPORTANT:** Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may experience U-joint fracture on the front prop shaft. The U-joint on the front prop shaft could seize or fracture, resulting in separation at the U-joint. If this failure occurs, the front prop shaft may completely disengage from the vehicle creating road debris, which can cause a vehicle crash without prior warning.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall to replace the front prop shaft on all affected vehicles. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in the 3rd Quarter of 2018.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
