

## L-18-03 RELEASED

Safety Bulletin L-18-03 Released

### BODY

Dear Polaris GEM Dealer,

Please review the following communication that was posted on Tuesday, 12/18/2018.

GEM has determined that some 2011-2016 Classic GEM eLXD vehicles may have been manufactured with a frame that does not meet Polaris quality standards. The lower main frame tube may crack which can result in failure of the secondary upper cab frame. If the upper cab frame fails, it can increase the risk of injury or crash.
