

U86 Safety Recall (Low Brake Pedal) Parts Availability & Supply Update

By **Mopar** on Thursday, August 23, 2018

AUGUST 2018

U86 SAFETY RECALL - LOW BRAKE PEDAL

REVISED DEALER INSTRUCTIONS - PARTS UPDATE

- CLAIM PROCESSING

Please refer to the below information as it relates to the **U86** Safety Recall (Low Brake Pedal) on various 2018 and 2019 Dodge and Jeep vehicles. VINs and Dealer Instructions are live now. Customer notification letters will be sent August 29th, 2018.

U86 PARTS AVAILABILITY UPDATE

Initially Brake Fluid (PN: 04318080AD) was available for dealer ordering, restricted to 3 cases in 7 days. The initial ordering measure lead to orders being backordered. Our supplier, KemKrest is working to fulfill these orders. Orders already placed by dealers will be fulfilled. In an effort to better support dealer business, dealer ordering is temporarily blocked and Mopar will allocate orders directly for dealers based on their VIN assignment. Orders will be continually allocated based on product availability.

REVISED DEALER INSTRUCTIONS

Revised dealer instructions are now available to reflect the approval of DOT 3 equivalent brake fluid. Equivalentts used during remedy must comply with **FMVSS116** (*Federal Motor Vehicle*) or **SAEJ1703** (*Society of Automotive Engineers*) standards.

PLEASE NOTE: NPN CLAIM PROCESS

If utilizing a non-Mopar DOT3-equivalent brake fluid, submit the U86 Recall claim with an NPN Part line item at dealer cost. Appropriate mark-up will be applied systematically.

PLEASE NOTE:

- Upon entering the NPN Part (000000NPN) on the claim, a brief description of the NPN part is required to be entered in the NPN Part Description Entry field.
- Dealer must retain the following support: Itemized part receipt showing dealer cost, core charges and discounts, etc.

FCA appreciates your support!
