2018-2019 GMC Terrain

To: All General Motors Dealers

This bulletin has been revised. Please discard all previous copies of bulletin 18279-01.

This bulletin has been revised so that dealers may utilize their remaining inventory of DOT 4 hydraulic brake fluid to complete this safety recall, GM is extending the dead-line for the submission of warranty transactions which include the use of DOT 4 fluid to November 16, 2018. The DOT 4 fluid in question was pre-shipped to dealers on September 17, 2018 due to a limited supply of DOT 3 hydraulic brake fluid when this recall was released.

All warranty transactions which include the use of DOT 4 fluid to complete this recall must be submitted for processing no later than November 16, 2018. Doing so will ensure that dealers are credited for the higher price of the DOT 4 fluid.

After that date, the warranty system will be adjusted back down to the standard price of the DOT 3 fluid which is specified in the recall bulletin for all involved vehicles except the Buick Regal.
