Re: *WTY-84 Valve Spring tool order process changes.*

The following five part numbers related to the WTY-84 Recall have had certain restrictions removed. Retailers are now able to order these numbers through the parts system. Quantities of these PNs are limited, so please restrict your order request to no more than 1 per retailer per PN. All orders will be reviewed, and excessive order quantities will be cancelled without notice.

99850AA000 – Valve spring removal/installation tools for FA (BRZ) engine

99850AA010 – Air supply regulator tool

99850AA020 – Bridge for FB Valve spring tools

99850AA030 – Valve spring removal/installation tools for FB engine

99850AA050 – Engine Stand

Retailers are no longer required to generate a Quality Monitoring Report (QMR) or contact the Parts Info Coordinators (PICs) to obtain replacement tools. Damaged WTY-84 tools are no longer required to be returned to SOA HQ.
