AJ11 Stop Sale Recall - Replace Brake System Components

Update 2/26/19

AJ11 Recall TI now attached to this posting.

Update 2/20/19

AJ11 Recall Parts Status Update: Parts for this recall can now be ordered as normal as needed. No PTEC/PAV or email required. Parts will NOT be automatically allocated to your dealership. In urgent cases parts can be PDX ordered.

AJ11 Recall TI is published in PIWIS. It will be available on this page as soon as possible.

Stop Delivery

Vehicles must not be delivered to customers until the required remedial measure has been carried out. Therefore, please carry out following Stop Sale, immediately.

Overview

Due to a temporary manufacturing fault at a supplier, it is possible that corrosion may occur within the brake line between the hydraulic unit and the master brake cylinder.

As a result, rust particles can settle in the filter elements inside the hydraulic unit and clog them. This can lead to a failure of the brake system.

In order to avoid any resulting danger, all components of the brake system in which rust particles may have settled must be replaced as a preventive measure.

***Please note: Complete technical instructions and necessary parts procurement are still in a planning phase and will be released as soon as possible. Please continue to monitor the PPN Campaign Space for all relevant updates and information.**

Model type	Panamera (971)
Model year	2018
Manufacturing period	Between 09/14/2018 and 12/18/2018
Number of affected vehicles	112

To download a list of your affected customers for this campaign, please follow the instructions found at <https://ppn.porsche.com/portal/docs/DOC-182765>.

Vehicle usage

Affected vehicles may be driven for loading and unloading within the transport chain and for test drives.

Vehicles that are already with the customer will be processed as part of the remedial measure described below.
