**Safety Recall JSL (Remedy Notice)
Certain 2008 – 2019 Model Year LX 570
Passenger Airbags Could Deactivate**

This Safety Recall was originally being administered with multiple campaign codes (JSL and J2L). Based on Lexus' engineering analysis, Lexus determined that certain vehicles (based, in part, on time in service) could be remedied through a modification to the seat belt assembly. In order to expedite repairs, Lexus dealers were asked to begin modifying the seat belt assembly for vehicles that could receive that remedy under campaign designation JSL. However, as the remedy for JSL was based, in part, on a vehicle's time in service, the remedy for vehicles originally covered by JSL is **NOT** available after June 6, 2019. There are no longer any vehicles eligible for the JSL remedy. Vehicles that were originally covered under campaign JSL but did not have JSL performed on or before June 6, 2019, have been transitioned to J2L and will receive the J2L remedy when it becomes available.

Refer to the J2L Dealer Letter on TIS for additional information.

Thank you for your support.
