**Safety Recall JS5 (Remedy Notice)
Certain 2008 – 2019 Model Year Land Cruiser
Passenger Airbags Could Deactivate**

This Safety Recall was originally being administered with multiple campaign codes (J15 and JS5). Based on Toyota's engineering analysis, Toyota determined that certain vehicles (based, in part, on time in service) could be remedied through a modification to the seat belt assembly. In order to expedite repairs, Toyota dealers were asked to begin modifying the seat belt assembly for vehicles that could receive that remedy under campaign designation JS5. However, as the remedy for JS5 was based, in part, on a vehicle's time in service, the remedy for vehicles originally covered by JS5 is **NOT** available after June 6, 2019. There are no longer any vehicles eligible for the JS5 remedy. Vehicles that were originally covered under campaign JS5 but did not have JS5 performed on or before June 6, 2019, have been transitioned to J15 and will receive the J05 remedy when it becomes available.

Refer to the J15 Dealer Letter on TIS for additional information.

Thank you for your cooperation.
