IMPORTANT SAFETY RECALL

Frame Bracket

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain [2009 – 2012 (DS) RAM 1500 Pickup] vehicles.

It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

WHY DOES MY VEHICLE NEED REPAIRS?

The front fuel tank strap on your truck ^[1] may become loose due to the frame bracket corrosion. With the front fuel tank strap detached, the rear strap primarily secures the fuel tank, however, the front of the fuel tank may be allowed to lower several inches. The vehicle driver may notice a noise, the strap or fuel tank hanging down, frame corrosion, or may be informed during an oil change/state inspection. Detachment of the front fuel tank strap could potentially allow the front of the fuel tank to make contact with the ground, increasing the risk of a fuel leak. **A fuel leak in the presence of an ignition source could result in a fire.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will install a fuel tank strap reinforcement bracket. If the fuel tank strap is found to be disconnected from the original frame bracket, the front and rear fuel tanks straps as well as the locking nuts, will be replaced. In addition, your dealer will require your vehicle for proper check-in, preparation, and checkout during your visit. Your time is important to us; please be aware that these steps may require more time. The estimated repair time is two and half-hours. We recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
