NHTSA Recall # 18V208**

May, 2018

- A remedy is available for your vehicle.
- Schedule an appointment with your authorized Mercedes-Benz dealer as soon as possible.
- This repair will be provided free of charge.

Dear Mercedes-Benz Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Daimler AG ("DAG"), the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year ("MY") 2018 Mercedes-Benz GLC-Class and AMG GT-Class vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

What is the CONCERN?

DAG has determined that on certain MY18 GLC-Class and AMG GT-Class vehicles (253 and 190 platforms), the housing for the driver side air bag inflator may have been made with defective steel. In the event of an air bag deployment, the defective steel could cause the inflator to improperly inflate the driver-side air bag and potentially rupture. In the event of a crash involving driver air bag deployment, an improperly inflated air bag and/or an inflator rupture with sharp metal objects might result in serious injury or death to the driver or to occupants.

What will your DEALER DO?

An authorized Mercedes-Benz dealer will replace the driver air bag. This service will be provided free of charge. We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time can be up to **approximately 1 hour**, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz dealer will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time.

What should YOU DO?
