IMPORTANT SAFETY RECALL

June 2018

This notice applies to your vehicle, **VIN:** _____

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2019 model-year Chevrolet Corvette ZR1 vehicles. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT
<ul style="list-style-type: none"> • Your vehicle is involved in GM safety recall 18195. • Schedule an appointment with your GM dealer. • This service will be performed for you at no charge.

Why is your vehicle being recalled? If the sensing diagnostic module (SDM) is exposed to hard braking and sustained acceleration events under certain track conditions, the SDM may enter a fault state and will not return to normal operation until battery power is removed from the system. In this faulted state, the SDM will not provide crash sensing or deploy airbags in the event of a crash. If the SDM does not detect a crash or command deployment of airbags, there is increased risk of injury in a crash.

What will we do? Your GM dealer will reprogram the SDM with updated software. This service will be performed for you at no charge. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual time of approximately 20 minutes.

What should you do? You should contact your GM dealer to arrange a service appointment as soon as possible.

Do you have questions? If you have questions or concerns that your dealer is unable to resolve, please contact the appropriate Customer Assistance Center at the number listed below.
