October 2018

This notice applies to your vehicle, **VIN:** _____

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2015 – 2016 Chevrolet Silverado and GMC Sierra 2500/3500 Heavy Duty Pickup Trucks, Chevrolet Silverado 1500 Special Service Pickup Trucks, and Chevrolet Tahoe Police / Special Service vehicles that may have been improperly serviced under Safety Recall 20760 (NHTSA 16V069). As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your vehicle is involved in GM safety recall 18278.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

The brake pedal pivot nut on these vehicles may become loose, causing the brake pedal to be loose or inoperative. If the brake pedal becomes loose or inoperative, the driver may be unable to safely stop the vehicle through application of the brake pedal, increasing the risk of a crash. A loose pedal may also interfere with the accelerator pedal, increasing the risk of a crash.

What will we do?

Your GM dealer will add adhesive to the brake pedal pivot nut, and reinstall the nut at an increased torque. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual time of approximately 2 ½ hours.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.
