November XX, 2018

Mr. Joe Customer
XXXX CENTRAL AVE
ALBANY NY 12205-2457

Dear Cummins Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Cummins Inc. has decided that a defect which relates to motor vehicle safety exists in certain ISX15 and X15 engines that were manufactured between December 1, 2015 and July 24, 2018.

Cummins previously mailed you an Interim notice advising you of this recall and informing you that you would receive this second notice when the remedy is available.

This notice applies to your engine(s), built before August 11, 2017, listed in the table at the bottom of this letter. You may have received a previous letter if you have additional engine(s) built on or after August 11, 2017.

WHY IS A RECALL BEING CONDUCTED?

If the fuel pump cooling circuit screens become sufficiently restricted and the engine is operated in an extended motoring condition, such as on a long down-hill grade, the engine may experience a burst nylon fuel line. If this occurs, the fuel line will leak fuel and the engine will not run when the operator depresses the accelerator. This condition may result in a significant volume of fuel leaking onto the roadway, causing a slick road surface that may present a hazard to other motorists. This condition may also cause an engine stall without warning and without the ability to restart, presenting a risk of a crash.

WHAT ARE WE DOING ABOUT THE PROBLEM?

Cummins has released field Safety Campaign #C2062 "ISX15/X15 CM2350 X10/X114B Fuel Line Safety Campaign" to correct this condition by replacing the affected nylon fuel line with a steel fuel line. Repair parts are currently available at Cummins Distributors and authorized Warranty Dealers for all engines in the affected production period. The repair will be completed free of charge and most applications will require approximately one hour to complete.

Engines eligible for Cummins Campaign #C2062, "ISX15/X15 CM2350 X10/X114B Fuel Line Safety Campaign":

Engine Serial Number	Vehicle Model	Vehicle Identification Number (VIN)
XXXXXXXX		1XYZXYZYZ123456789
