NHTSA Recall 18V-777

IMPORTANT SAFETY RECALL

This notice applies to your vehicle: XXXXXXXXXXXXXXXXXXXX

Dear <First Name Last Name>,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

WHAT IS THE REASON FOR THIS NOTICE?

Acura has decided that certain 2017–2019 model year MDX and 2017–2018 model year MDX Sport Hybrid vehicles fail to conform to Federal Motor Vehicle Safety Standard No. 135 – Light vehicle brake systems. Due to a manufacturing error, the rear brake pistons were coated with excessive levels of hydrogen which could be released into the brake system. If hydrogen gas is released into the brake system, it could result in reduced braking performance and increase the risk of a crash without prior warning.

WHAT WILL ACURA DO?

The dealer will bleed the brake system to remove any hydrogen gas present for free.

WHAT SHOULD YOU DO?

Please call any authorized Acura dealer and make an appointment to have the brake system on your vehicle bled for free. Once you make an appointment, be advised that the complete repair process may take approximately 1 hour and 45 minutes to 2 hours. However, your dealer can provide you with a better estimate of the overall time for this service visit, as it may be necessary to make your vehicle available for a longer period of time. If you are not the only driver of this vehicle, please advise all other drivers and passengers of this important information!

CHECK YOUR VEHICLE FOR OPEN RECALLS

You can check your vehicle’s eligibility for repair under this or any other recall. Please access the ***Acura Recall Lookup*** tool at www.recalls.acura.com and enter your Vehicle Identification Number (VIN).

If you are a lessor of this vehicle, federal regulations require you to forward this notice to your lessee within ten days.
