**Subject: Safety Recall 20BJ – Fuel Pump Flange  
Certain 2007-2012 MY Audi Q7 and 2009-2012 Audi Q5 Vehicles**

Dear Audi Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Audi has decided that a defect, which relates to motor vehicle safety, exists in certain 2007-2012 MY Audi Q7 and 2009-2012 Audi Q5 vehicles. Our records show that you are the owner of a vehicle affected by this action.

**What is the issue?** The affected vehicles were included/repared in an earlier safety recall, Audi Safety Recall code 20W9 (NHTSA 16V-660). Under that safety recall, the fuel pump flange had been inspected and was found to have minor cracks (but no fuel leak), and butyl tape was applied to the fuel pump flange as an interim repair. The butyl tape repair may not fully prevent a future fuel leak at the fuel pump flange in these vehicles. Leaking fuel, in the presence of an ignition source, may result in a fire.

**What will we do?** To correct this defect, your authorized Audi dealer will replace the fuel pump flange and install butyl tape on top of the new flange to protect it from outside contamination. This work will take about two hours to complete and will be performed for you free of charge.

**What should you do?** Please contact your authorized Audi dealer without delay to schedule this recall repair. For your convenience, you can also visit [www.audiusa.com](http://www.audiusa.com) and click on the "Find a Dealer" link to locate a dealer near you and schedule this service.
