IMPORTANT SAFETY RECALL

Seat Track Position Sensor

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain [2019 (DT) RAM 1500 Pickup] trucks.

It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

WHY DOES MY VEHICLE NEED REPAIRS?

The seat track on your truck ^[1] may have been built with a seat track position sensor, located on the manual passenger seat, that may become loose and out of position. An out of position seat track position sensor may be unable to detect the full forward seat position preventing the Occupant Restraint Controller from choosing the desired passenger airbag deployment parameters. **A passenger airbag deploying with other than the desired parameters in a crash may result in an increased risk of injury to the passenger, if the seat is in the full forward position.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will inspect for a loose manual passenger seat track position sensor bracket and replace if necessary. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit. Your time is important to us; please be aware that these steps may require more time. The estimated repair time is two hours. We recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
