IMPORTANT SAFETY RECALL

Brake Fluid Tube

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain [2017 and 2018 model year Alfa Romeo Giulia] vehicles equipped with a 2.0L 280HP engine and All Wheel Drive (AWD).

It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

WHY DOES MY VEHICLE NEED REPAIRS?

The brake fluid tube on your vehicle ^[1] may experience contact with a coolant hose clamp in the engine compartment. Over time, this contact may lead to a brake fluid leak onto the engine catalyst. **If the brake fluid tube is damaged and brake fluid leaks onto the engine catalyst, the customer may smell a burning odor or see smoke, and there is a potential for an engine compartment fire which may result in an increased risk of injury to motor vehicle occupants or persons outside the vehicle.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will install a locating bracket on the brake fluid tube to control the clearance of the brake fluid tube to the coolant hose to prevent contact. If the brake fluid tube is damaged, a new brake fluid tube will be installed. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit. Your time is important to us; please be aware that these steps may require more time. The estimated repair time is between one to three hours. We recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
