Dear Mercedes-Benz Metris Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Daimler AG ("DAG", the manufacturer of Mercedes-Benz Vans, has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2016 and 2017 Mercedes-Benz Metris vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

***What is the CONCERN?***

DAG determined that certain Mercedes-Benz Metris vehicles (Platform 447) may exhibit minor fuel leakage at the lower connecting point of the transition hose. In addition, limited fuel "weeping" in the upper connection of the fuel line to the fuel pump - which typically produces fuel odor, but no significant loss of fuel from the system - could be present during cold start conditions. Fuel leakage in the presence of a potential ignition source within the engine compartment could create the risk of a fire.

***What will your DEALER DO?***

An authorized Mercedes-Benz Metris dealer will check the two possibly affected connections of the fuel line on all potentially affected vehicles and replace them, if necessary. This service will be provided free of charge. We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time can be up to **approximately 2 hours**, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz dealer will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time.

***What should YOU DO?***
