**What is the issue?** The auxiliary heater connector may not have been properly inserted into the auxiliary heater. This can lead to increased contact resistances in the connector area and result in a thermal overload, which may cause smoldering and the risk of a vehicle fire.

**What will we do?** Your authorized Audi dealer will perform this recall repair for you free of charge.

To correct this defect, the auxiliary heater electrical connection will be inspected and, if necessary, the auxiliary heater and the connector will be replaced. For most vehicles, this work will take about an hour to complete.

If your vehicle needs to have the auxiliary heater and connector replaced, parts will need to be ordered. Once your dealer has the parts on hand, the repair will take about two hours to complete.

Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.
